

Investing for Success

Snapshot report

**Under the Investing for Success Agreement for 2017
Guluguba State School received**

\$5000

Our school initiatives are on track to meet or exceed our targets

During 2017, we focused on maximising the benefits of this funding for our students. After reviewing our 2017 *Investing for Success* agreement, it is clear that we are on track to meet or exceed our targeted student outcomes. We continue to implement our initiatives to ensure that every student succeeds.

Initiatives implemented include:

- Employing suitably trained teacher-aides to work with Prep students to provide intensive instruction and specific teaching strategies in writing.
- Supporting a Pre-Prep transition process in Term Four, with children attending Guluguba School in 2018. Additional teacher-aide time was allocated to allow for the classroom teacher to work with the children in readiness for next year.
- Staff accessed the Early Start materials and scheduled assessments to monitor student progress and strategies for intervention.
- Community members accessing a fortnightly school based playgroup. The playgroup complemented existing services, and was supported by a teacher-aide who facilitated the morning's activities. On average, seven children from the Guluguba community in the age group of 0 to 5, regularly attended the playgroup, along with their parents.
